Q.1 — Configuration of the device group can best be understood in terms of what is happening "under the hoo" (i.e., beneath the surface, or behind the interface which the GUI provides). Describe the activities "under the hood" in terms which you have learnt in your study of the OSI 7-layer model.

A — hello

Q.2.1 — Count the number of packets that you have captured and compare this with the setting in the stream configured on the packet generator.

A — Hello

Q.2.2 — Write down the numbers (leftmost column) of the packets that have been generated by:

- the packet generator

- the DUT

A — Hello

Q.2 — Here second question would come

A — Hello

Q.2 — Here second question would come

A — Hello

Q.2 — Here second question would come

A — Hello

Q.2 — Here second question would come

A — Hello

Q.2 — Here second question would come

A — Hello
